PROFESSIONAL SUMMARY

Entry-level Data Analyst with hands-on experience in SQL, Python, Excel, and Power BI, specializing in data cleaning, exploratory data analysis (EDA), dashboarding, and business reporting. Strong ability to analyze large datasets, identify trends, and transform raw data into actionable business insights. Experienced in requirement analysis, stakeholder communication, MIS reporting, and KPI tracking to support data-driven decision-making.

TECHNICAL SKILLS

Programming & Data Analysis: Python (Pandas, NumPy, Matplotlib, Seaborn), SQL (MySQL, joins, subqueries, aggregations, window functions), Data Cleaning, Data Validation, EDA, Statistical Analysis, Hypothesis Testing

Business Intelligence & Visualization: Power BI (DAX, Power Query, KPI Dashboards, Interactive Visuals), Tableau (Dashboards, Charts, Storytelling), Data Storytelling, Metrics Tracking, Executive Reporting

Spreadsheets & Automation: Advanced Excel (PivotTables, VLOOKUP/XLOOKUP, INDEX-MATCH, Macros, Power Query, Conditional Formatting), MIS Reporting, Automation of Repetitive Tasks

Analytics Concepts & Tools: ETL Processes, Data Modeling, Data Warehousing, KPIs, Business Metrics, Requirement Analysis, Dashboard Design, Performance Monitoring, GitHub, Jupyter Notebook, Data Documentation

EXPERIENCE

Data Analytics Trainee (Internship-Style Experience)

Mar 2025 – Oct 2025

KGISL MicroCollege

- Completed hands-on training focused on real-world data analytics, business reporting, and dashboard development.
- Worked on end-to-end analytics tasks including data cleaning, SQL querying, Python-based EDA, and Power BI reporting.
- Performed requirement analysis, data validation, KPI tracking, and insight-driven reporting aligned with business scenarios.

PROJECTS

IMDB Movie Analytics – MySQL

[GitHub](#)

- Analyzed 10,000+ movie records using advanced SQL queries including joins, subqueries, aggregations, and window functions.
- Explored audience ratings, genre performance, and director success metrics to uncover viewing and rating patterns.
- Generated structured insights to support content performance evaluation and data-driven decision-making.

IT Layoffs Analysis (2019–2024) – Excel, MySQL, Power BI

[GitHub](#)

- Cleaned, standardized, and integrated multi-source layoff datasets using Excel and SQL.
- Built interactive Power BI dashboards with KPIs to analyze layoffs by year, country, industry, and company.
- Identified high-impact trends and workforce risk patterns to support strategic workforce planning insights.

Global GDP & Population Analytics – Power BI

[GitHub](#)

- Transformed and modeled global GDP and population datasets using Power Query and SQL.
- Developed DAX measures such as GDP per capita and growth indicators for comparative analysis.
- Designed executive-ready dashboards highlighting economic disparities and regional development trends.

EDUCATION

Data Analytics Program — KGISL MicroCollege

2025

B.Sc. Computer Science — Bharathidasan University

2023
